TARIFF FORMAT

Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between existing pages with whole numbers, a decimal is added. For example, a new page added between pages 34 and 35 would be page 34.1.

Page Revision Numbering - Revision numbers also appear in the upper right corner of the page. These numbers are used to determine the most current page version on file with the Commission. For example, 4<sup>th</sup> Revised Page 34 cancels 3<sup>rd</sup> Revised Page 34. Consult the check sheet for the page currently in effect.

Check Sheet - When a tariff is filed with the Commission, an updated check sheet accompanies the tariff filing. The check sheet lists the tariff pages, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made. The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

Explanation of Symbols - When changes are made in any tariff page, a revised page will be issued canceling the tariff page affected. Changes will be identified on the revised page(s) through the use of the following symbols:

- (R) - to signify a reduction.
- (I) - to signify an increase.
- (C) - to signify a changed regulation.
- (N) - to signify a new rate or regulation.
- (D) - to signify a discontinued rate or regulation.

In addition to symbols for changes, each changed provision in the tariff shall contain a vertical line in the right hand margin of the page which clearly shows the exact number of lines being changed.
