**PRICE LIST FORMAT**

- A. **Sheet Numbering** – Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the price list. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** – Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4<sup>th</sup> revised sheet 14 cancels the 3<sup>rd</sup> revised sheet 14.
- C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1.A
  - 2.1.1.A.1
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a).I
  - 2.1.1.A.1.(a).I.(i)
  - 2.1.1.A.1.(a).I.(i).(1)
- D. **Check Sheets** – When a price list filing is made with the Commission, an updated Check Sheet accompanies the price list filing. The Check Sheet lists the sheets contained in the price list, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The price list user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the Commission.

**SECTION III – DESCRIPTION OF SERVICES (CONTINUED)**

**3.2 Calculation of Distance**

3.2.1 Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

3.2.2 The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved.

3.2.2.A FORMULA: 
$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

**3.3 Minimum Call Completion Rate**

3.3.1 Customers can expect a call completion rate of 98% during peak use periods for all Feature Group D Equal Access 1+ services. The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

**3.4 Rate Period Overlap**

3.4.1 For messages which overlap one or more rate periods, the rate in effect at the time of call origination in the originating area applies to the entire duration of that call.

3.4.2 Subject to the billing increments set in this tariff, plus any additional charges which may apply, long distance usage charges are based on the actual usage of Excel's service. Usage begins when the called party picks up the receiver. When the called party picks up, timing is determined by hardware answer supervision. Chargeable time ends when either party "hangs up," thereby releasing the connection. Excel does not bill for uncompleted calls.

**3.5 Service Area**

3.5.1 The service area of Excel includes all Equal Access points in Washington.

**SECTION IV – RATES**

4.1 **ExcelPLUS Service**

4.9 Excel Operator Services

The Company's Operator Services is available throughout the State of Washington on a Customer-presubscribed basis only. Callers access the Company's Operator Services by dialing 0 + a 10-digit telephone number, 00 or a Company-provided access code, or other Company-authorized access method plus the telephone number of the called station. Upon receipt of the call, the Company may verify the credit-worthiness of the designated billed party. When a payment method cannot be validated, or is unacceptable, callers may be required to select an alternative and acceptable means of payment. Total charges for use of this service include usage charges and an Operator Assistance Service Charge, as set forth below. An Operator Dialed Service Charge also applies to calls in which the caller has the capacity to dial the number, but has the operator dial instead. Usage charges are based upon the duration of a call, and are flat per-minute based, 24 hours per day, 7 days per week, during all Time-of-Day Rate Periods. The Time-of-Day Rate Periods are defined as follows:

- **Day Rates** are applicable to calls placed Monday through Friday from 8:00 AM to, but not including, 5:00 PM.
- **Evening Rates** are applicable to calls placed Sunday through Friday from 5:00 PM to, but not including, 11:00 PM, and on Carrier-Recognized Holidays, unless a lower rate would normally apply.
- **Night/Weekend Rates** are applicable to calls placed Sunday through Friday from 11:00 PM to, but not including, 8:00 AM the following day, and all day Saturday.

Chargeable time begins when the Company receives signaling to detect that the network connection between the calling station and the called station has been established. Chargeable time ends when either party "hangs up", thereby releasing the network connection. For collect calls, chargeable time begins when the called station accepts responsibility for payment of the charges associated with the call. All calls are measured and billed in one-minute increments; fractional minutes of use are rounded up to the next full minute.

4.9.1 Operator Assistance Service Charges and Surcharge Descriptions:

A Service Charge is applicable to Customer Dialed (Automated) Calling Card Station, Operator Assisted Calling Card Station, Operator Station-to-Station (including Sent Paid, Sent Collect, Third Number Billed or Calling Card), Person-to-Person (including Sent Paid, Sent Collect, Third Number Billed or Calling Card) and for Busy Line Verifications and Busy Line Interruptions. These charge(s) are in addition to the initial period and additional period per-minute usage charges applicable to each call. When a call is subject to more than one Service Charge, only the highest Service Charge applies, unless indicated otherwise herein. Operator Assistance Service Charges vary depending upon the billing option selected by the caller. The following call placement options are available:

- a. **Operator Station-to-Station** – refers to when an end user requests operator assistance in reaching a telephone number and is willing to talk to anyone who answers. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Party Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Station-to-Station Operator Services, the caller's dialing sequence could be: 0 + a 10-digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Station-to-Station call be placed.
- b. **Person-to-Person** – refers to when an end user requests operator assistance in reaching a specific person, department, extension, office, etc. The operator dials the number and stays on the line until the requested party is reached and conversation begins. The call may be billed as Sent Paid (calling party pays for the call), Sent Collect (called party pays for the call), or may be billed to a Third Number or Calling Card. Sent Collect and Third Number Billed calls may not be allowed in locations where the Company does not have billing arrangement availability. To activate Person-to-Person Operator Services, the caller's dialing sequence could be: 0 + a 10-digit telephone number, or 00 (only), or any other Company-provided access method, to get an operator directly to request that a Person-to-Person call be placed.

SECTION IV – RATES (CONTINUED)

4.9 Excel Operator Services (Continued)

4.9.1 Operator Assistance Service Charges and Surcharge Descriptions (Continued):

- c. **Busy Line Verification** – refers to those instances where the Company will provide operator assistance to determine if there is conversation ongoing on a called station. A Service Charge is applied to all attempts to verify the condition of a customer line, busy talking, busy not talking (e.g., off hook), except attempts which are unsuccessful due to network equipment failure.
- d. **Busy Line Interruption** – refers to those instances where the Company operator will interrupt an ongoing conversation on a called station. A charge will apply each time the Company operator attempts the Emergency Interruption, whether or not the interruption is successful. A Busy Line Verification must be made and its service charge applied before an Emergency Interruption can be attempted. Once an operator has verified the line, and the called party has agreed to accept the interruption, the Customer is provided the option of completing an operator-assisted call to the called station without hanging up or originating a separate call. Customers may accept or refuse the operator’s offer to complete the call. Calls completed with the operator’s assistance will be charged an additional Service Charge under Station-to-Station or Person-to-Person, as applicable. If the operator dials or completes the call to the verified telephone number for the Customer, the Operator Dialed Surcharge will also apply.
- e. **Operator Dialed Surcharge** – will apply to Station-to-Station and Person-to-Person calls when the Customer has the ability to dial all the digits necessary for call completion but dials instead “0”, “00”, or another Company-provided access code or other Company-authorized access method to reach a Company operator to have the operator place the call. This surcharge will be incurred by the Customer in addition to the applicable Service Charge. However, the surcharge will not apply to: (1) calls which cannot be completed by the Customer due to equipment failure or trouble on the Company’s network; (2) calls placed by parties identified as handicapped and who cannot complete the calls due to the handicap; and (3) calls made on a 0- basis in which a Company operator places a call for a calling party after a Busy Line Verification and Busy Line Interruption process has been successfully completed.

In additional to all other charges for services under this tariff, an undiscountable pay telephone use charge of \$0.6000 shall apply to each coinless call which Excel can identify as placed from a pay telephone by or to the Customer or its permitted users. This charge is for the use of the pay telephone instrument to access Excel service. Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies, and other interexchange carriers. The Pay Telephone Use Charge applies to the initial completed call and any reoriginated call (i.e., using the “#” symbol on the pay telephone keypad).

- f. Legislative, Regulatory or Judicial Activity:

Notwithstanding any statement to the contrary contained in this tariff, in the event that any regulatory agency, legislative body, or court of competent jurisdiction promulgates regulations or modifies existing ones, including, without limitation, regulations regarding pay telephone compensation, access charges and/or universal service (“Regulatory Activity”), Excel reserves the right to: (i) pass through to the Customer all, or a portion of, any charges or surcharges directly or indirectly related to such Regulatory Activity; or, (ii) modify the rates, including any rate guarantees, and/or terms and conditions contained in this tariff to reflect the impact of such Regulatory Activity.

**g. Minimum Usage Fee**

Customers of any and all services described in Section 3 will be assessed a Minimum Usage Fee, per account, in each billing cycle in which their qualifying Excel charges do not meet the minimum usage amount for their bill type. The Minimum Usage Fee is the difference between the minimum usage amount (i.e., \$5.00 or \$10.00 based on bill type) and the Customer's qualifying charges in a billing cycle. Customers billed directly by Excel will be assessed a Minimum Usage Fee if their qualifying charges total less than \$10.00 in a billing cycle. Customers billed through their local telephone company will be assessed a Minimum Usage Fee if their qualifying charges total less than \$5.00 in a billing cycle. The Minimum Usage Fee will not apply to Customers of Excel's local exchange services or to customer accounts with no call usage in a given billing cycle when the account is assigned to a rate plan without a monthly fee or to one with only a monthly access fee, a fee which is billed only if the customer has used the service during the billing cycle.

Qualifying charges to be applied toward calculating the monthly usage minimum will be derived only from the following Excel charges: all long distance, calling card, toll free, operator assisted and directory assistance usage charges, Carrier Cost Recovery Fee as well as any monthly access fees or monthly recurring charges associated with the customer's rate plan.
